

STEALTH NINJA

3D Coloring Page!

OUT OF THE MIST LEAPS THE ASTOUNDING
STEALTH NINJA — A FIGURE THAT'S SO ELUSIVE AND MYSTERIOUS THAT
NO ONE IN THE WORLD HAS SEEN IT BEFORE ... UNTIL TODAY!

WHAT DOES THE STEALTH NINJA LOOK LIKE? IS IT A MAN, WOMAN,
BOY, OR GIRL? (PERHAPS IT'S NOT EVEN HUMAN!) AND WHAT IS THE
STEALTH NINJA WIELDING IN ITS MIGHTY GRIP? THE POWER TO BRING
THE STEALTH NINJA TO LIFE IS IN YOUR HANDS.

STEALTH NINJA

INSTRUCTIONS: 1) Print me on 65lb card stock paper for best results. 2) Invent and draw your character with colored pencils, markers, crayons, whatever! You get bonus points for straying OUTSIDE the lines if your creative ideas demand it! 3) Trim out the pieces as indicated with scissors. (Don't forget to cut the assembly slots in each piece.) Assembly slots slide into each other and hold your paper craft together without glue or tape! 4) Rules demand that every Desktop Gremlins paper craft has a name and a legend! So, write a short story for your character and record its vital statistics with the Fantastical Fact-o-meter!

I AM PROUD TO PRESENT TO YOU **EASY** FASCINATING AND ELEGANT CONSTRUCTION TECHNIQUES THAT YOU WILL HELP YOU BRING YOUR ART TO LIFE

Invent! Every Desktop Gremlins project is engineered to inspire you to unleash your creativity. You'll notice that the character pieces are often represented without many details on them. This empowers you to invent the character of your dreams! Start with a pencil (and a light touch) to test out different expressions, body shapes, or special features. Do you want your NINJA to actually be an ASTRONAUT? No problem! Just ignore my guidelines and draw your own body shape!

Color! When you have your character planned out just right, color it the way YOU want it to look. You can use colored pencils, crayons, markers — whatever!

Cut! Every Desktop Gremlins paper craft project can be built with just one tool—scissors! NO GLUE, NO TAPE, NO KNIVES REQUIRED! After inventing and coloring your character pieces, cut out the pieces to bring your art to life! What I like to do is take a first pass to separate all the pieces from each other. Then I perform fine-tune cutting.

See how you're rotating this page around to read

Shhhh! The secret to the elegant and fascinating world of Desktop Gremlins paper craft exists around a technique I like to call "assembly slot construction." You should have noticed little arrows pointing to them as you were cutting out your pieces. Take your scissors and make a cut right on these lines. When putting your paper craft together, you'll be matching these assembly slots up and sliding them INTO each other to create connections! Here is a simple example of the assembly slot construction technique:

Rotate the PAPER while cutting—not the scissors—and you'll get pro-looking edges (and impress your friends)!
